Profile

Software engineer with experience building fast, scalable cloud applications. Experience with JavaScript, Ruby, PostgreSQL, Docker, Rails, and React. Former educator and M.Ed.

Professional Experience

Co-Creator, Software Engineer, Satellite 2020 – present
<https://satellite-baas.github.io/>

Satellite is a multi-instance backend-as-a-service (BaaS) that provides the essential features of data persistence, frontend hosting, and a GraphQL API without the complexities of managing and configuring servers. Built with Node.js, Express, Kubernetes, Docker, React, and DGraph.

- Worked with a remote team to create Satellite's infrastructure
- Co-built Satellite core application for a single backend
- Designed the Admin GUI for managing and deploying Satellites using React
- Integrated the Admin GUI with Satellite and the Kubernetes cluster
- Contributed to architectural decisions regarding Satellite's multi-instance infrastructure
- Successfully tested Satellite deployment on several cloud providers (Digital Ocean, Azure, GCP)
- Co-authored technical case study, detailing Satellite's design and implementation

Full Stack Web Developer, Self-Employed 2019 – 2020
Remote. Built open-source projects using Ruby, JavaScript, Node.js, SQL, React, HTML/CSS, and Express.

- DS-Plus: an NPM package built with JavaScript that provides fast, non-native data structures
- Regexer: a Regex editor that evaluates Ruby and JavaScript expressions, built with React and Ruby
- Mello: a Trello clone built in React and Redux with a Rails API backend that supports creating, editing, and deleting boards, lists, and cards
